

**Multi Top Floor®**

**“Quality Hardwood Flooring”**  
*As resilient as nature*

## Living comfort the way you want it

*Multi Top Floor® reflects the particular style of your interior by using real wood. You feel the cosiness and tasteful class throughout your home of a real wooden floor, without the unpleasant disadvantages of using solid wood.*

*Real wood, for real living*

Multi Top Floor® is a Dutch top quality product with unprecedented stability. Because of the unique construction, shrinkage and expansion are virtually eliminated. It is even acceptable for use with under-floor heating, provided guidelines are followed. All these points together create the living comfort you are used to.

## The natural look of real wood – why use Imitations?

For every interior there is a compatible floor, with its own unique character. Oak, Walnut , Cherry, Ash, Teak or Jatoba:

Multi Top Floor® is possible in many species. The floor can be finished in several ways: with oil, wax or lacquer - in required colours, or single/double smoked or stressed.

Our technology allows a large number of variations, from timeless classics to trendy or modern. With Multi Top Floor® the result is always stunning.

*Every floor is individual*

## **Timber in the house: tasteful, in more ways than one!**

Pay attention to the MTF authenticity. Each MTF plank has been branded with its own serial number and offers a 5 year guarantee.

## **Timeless beauty**

Wood lives. It adapts to its surroundings. It breathes. That makes it timeless and exquisite. It meets the demands of today's comfort, the need for robust construction and ease of maintenance.

Nothing can beat the beauty of genuine wood. Multi Top Floor® combines all of this.

## **Cosiness throughout the house**

Authentic and pleasant. That is what we desire from a floor, not restricted to the living room. Multi Top Stairs® carries the warmth and comfort of real wood up the stairs throughout the home to any bedroom or room.

# A refreshed look, all day

*Carry the elegant style of Multi Top Floor®  
to a bedroom with Multi Top Stairs®*

## Multi Top Floor®: Stylish and stable

Wood is a natural product, maybe one of the reasons why we are attracted to it. However, being natural, shrinkage and expansion are often the reasons why wood is not chosen as a flooring solution. Multi Top Floor® overcomes the reasons for not choosing wood due to how it is produced.

With a plank width up to 280mm, combined with many finishing possibilities, Multi Top Floor® products offer a look of style that is risk-free and made to last. Multi Top Floor® engineers have developed a method of pressing and adhering the chosen species of wear-layer onto the Birch plywood. As a result Multi Top Floor® is always flat, straight and stable. This process is very flexible so almost any species of wood can be used to make Multi Top Floor®. If you require a particular species that we do not show in our current range, do not hesitate to ask us, if we can source the species we can make your floor.

Due to the stability of Multi Top Floor®, we do not insist on allowing the product to acclimatize. It can be fitted as a floating floor over concrete or wood. It is suitable for use with under-floor heating, installed by certified professionals, and in line with our specified guidelines. Multi Top Floor® is the perfect link between aesthetic appeal, strength, stability and cost.
